College with Potential for Excellence by UGC and Mentor Institution under UGC PARAMARSH)

CONSTRUCTION OF TANKS

Water Tanks have been constructed and purchased to provide adequate water facility. There are totally 29 water tanks and 53 rain water harvesting tanks in the campus which provides both utility and drinking water. Water to the tanks are got through rain water harvest plant, bore wells and direct purchase of water. Water processed through RO Plant is sent to the separate water tanks after which the drinking water is distributed throughout the campus at different water points.
