Attendance of meetings/workshops- photos from 2012

S.No	Dates	Programme
1	14/10/2019	Creating courses in SFR Learning Management System
2	10/09/2019	Creating course modules using MOOC templates
3	31/07/2019	Publishing Quiz using Adobe Captivate
4	09/07/2019	Discussion on the usage of NPTEL video lessons, Mind maps, E-learning materials
5	26/09/2018	Demonstration Class on ‘Video Preparation using PowerDirector’
6	29/08/2018	Lecture on ‘E-Content, MOOC courses and Google Classrooms’
7	16/07/2018	Demonstration Class on ‘Recording and editing Audio Lessons’
8	13/07/2018	Workshop on ‘GSuite for Education
9	07/07/2018	Creating courses and Lessons in SFR LMS
10	28/2/2018	Creating Courses and generating reports in SFR LMS
11	06/09/2017	Workshop on Adding Effects in Videos using Power Director
12	30/08/2017	Training on Creating courses and generating Reports in SFR LMS
13	16/02/2017	Demonstration on video editing techniques
14	13/02/2017	Demonstration on video editing techniques
15	7/1/2017	Demonstration on Quiz and Assignment Reports in SFR LMS
16	26/8/2016	Demonstration on "Effects in Adobe Premiere Pro"
17	2/7/2016	Creating quizzes and assignments in SFR LMS
18	23/06/2016	Discussion about the usage of NPTEL video lessons, Mind maps, e-learning materials and selection of topic for preparation of e-content
19	27/8/2015	Workshop on Creating Courses, Lessons, quizzes and assignments in SFR LMS
20	12/8/2015	Workshop on “Laboratory Training Programme on SFR Learning Management System”

College with Potential for Excellence by UGC and Mentor Institution under UGC PARAMARSH)

**Discussion on the usage of NPTEL video lessons, Mind maps, E-learning materials
09/07/2019**

THE STANDARD FIREWORKS RAJARATNAM COLLEGE FOR WOMEN, SIVAKASI
(An Autonomous Institution affiliated to Madurai Kamaraj University, re-accredited with A Grade by NAAC and College with Potential for Excellence by UGC)

E-Content Development Cell

The members of the E-Content Development Cell met on 09-7-19 at 12.45 p.m and discussed the following matters.

- Mind maps shall be prepared for each course (at least one for each course) and the softcopy is to be stored in \e-content\inbox. Print outs of mind maps shall be photocopied for the use of students. Mind maps prepared for each course must be unique. Staff should not use the same mind maps submitted earlier. The topic names should be used as filenames.
- E-Content/Learning Object (video lesson) prepared by staff from the year 2013 onwards must be screened for the students and feedback can be obtained from them.
- Downloaded content (NPTEL, You Tube videos etc.) must be saved in the respective folders available in \e-content\inbox. A minimum of one video class per course shall be screened. Two copies of evidences are to be obtained .One should be submitted to the Cell and another shall be filed in the departments.
- A workshop on Course Module-Review Quiz preparation will be conducted during **first term test week.**
- The staff members who have not submitted **Course Modules for the previous semester** are asked to submit before **16.07.19.**
- One **Course Module** must be prepared by each member during the academic year 2019-20. Soft copy of **Course Module** shall be submitted to **Dr.(Mrs).A.Bamini, Assistant Professor of Computer Applications before 21.12.19.**
- The members who have enrolled their courses in **SFR Learning Management System** are asked to use and modify the course prepared in the previous odd semester with the newly mapped students. New courses can also be created and used. Quizzes and assignments can be given through SFR LMS.
- All the members who have **no user id in SFR LMS** are asked to give their details to **Mrs.V.Vanthana, Assistant Professor of Computer Applications on or before 18.07.19.**
- **Last date for submission of Mind maps, Video lesson evidences – 13.09.19**
- Evidences shall be submitted to the respective staff members.
Evidences of Videos : Mrs.M.Govindammal, Department of Commerce (R)
Softcopies of Mind maps : Mrs. V.Vanthana (Computer Applications) and Mrs.G.Krishnaveni(Computer Applications)

Mrs. S.Sathya,

IQAC Advisor

Associate Professor of Computer Science

SFR College for Women

Sivakasi

Madam,

The Internal Quality Assurance Cell (IQAC) has proposed to organize a one day Faculty Development Programme to the Teaching Faculty of our college on **Outcome Based Education** on Wednesday, the 28th August 2019 from 9.30am to 4.30pm. We thank you for accepting our Invitation to be the Resource Person for the morning session on **Outcome Based Education – A Transformative Learning**. We are sure that your presence and address will enrich our faculty members on OBE. We look forward to meeting you.

With regards

Principal

Madam,

Greetings from ANJAC.

On behalf of the Curriculum Development Cell of our College, I cordially invite
you to deliver a Special Lecture on "CO-PO Mapping in OBE" to our Staff Members on Thursday,
the 20th February, 2020 in our College.

Please make it convenient to be in the campus to deliver the Lecture.

Thanking you

Yours sincerely

Dear Madam,

Subject: Invitation as Resource Person for the Webinar on Outcome Based Education (OBE)
on 08.06.2020 & 09.06.2020 - Reg.

We are delighted to express our sincere thanks for accepting our invitation to act as the
Resource Person for the Webinar on Outcome Based Education (OBE) on 08.06.2020 &
09.06.2020 for our College faculty members organized by our Internal Quality Assurance
Cell (IQAC).

It will be our pleasure to listen your expert talk in the related area of Outcome Based
Education in preparing syllabus. Hence, on the behalf of the organizing committee,
I would like to invite you to grace the above motioned webinar as a Resource Person.

We have also enclosed the webinar brochure for your kind information and looking forward
to welcome you to Google Meet room.

Thanking you,
Dr. P. Sundara Pandian
Principal

University,
Sendai. Japan.**

The Department of Physics conducted the International Webinar on “Spectroscopic Techniques for Energy Materials Characterization” on 23.07.2020 at 11.00 am to 12.00 pm via google meet (online platform). Dr. F. Kingslin Mary Genova, Associate Professor, Department of Physics delivered the welcome address. Dr. S. Selvalakshmi, Assistant Professor of Physics introduced the resource person. The resource person Dr. Arunkumar Dorai, Assistant Professor, Institute of Multidisciplinary Research for Advanced Materials, Tohoku University, Sendai. Japan, clearly explained about the various spectroscopic techniques and its applications for energy storages. One hundred and fifty participants including staff members and students actively participated in the webinar. Finally, Dr. R. Sudha Periathai, Assistant Professor of Physics delivered the vote of thanks. The webinar is appreciated by the participants from their 150 feedback responses.

Abstract

The learner community today is becoming more and more attached to their electronic gadgets like smart phones, tablets and laptops. Technology provides a way of communication but is the only way to communicate with today's youth. The traditional teaching methods really have their own limitations to deal with the varied needs of the present generation. There is an urgent need for the institutions of higher learning to substantially change how the young people of today and generations to come are taught to learn. In a country like India, where the gross enrolment ratio needs to be increased, the quality of education is equally important. To make the learners totally involved in their learning process, it is essential to switch over from the traditional teaching process to modern methods. The present scenario aims at management of course materials, anywhere learning, beyond classroom activities, online assignments and quizzes and discussion forums. To succeed at the task, we need an effective model that depends on interactive communication and on collaboration. LMS is an innovative teaching and learning strategy, a model that fosters education outside classrooms or institutions. LMS helps to manage learners, keeping track of their progress and performance across all types of training activities. The LMS manages and allocates learning resources such as registration, classroom and instructor availability, instructional material fulfillment, and online learning delivery. This system would develop a habit of continuous learning and it will cut across ages and classes. This article highlights the LMS www.onlinekalvi.com developed by the author for personalized and collaborative learning.

Keywords: Learning Management System, Learning Community, onlinekalvi.com

1. Introduction

E-LEARNING has been a topic of increasing interest in recent years. Content authors, instructional designers, multimedia technicians, teachers, trainers, database administrators, and people from other areas of expertise work together to serve the

**THE STANDARD FIREWORKS RAJARATNAM COLLEGE FOR WOMEN (AUTONOMOUS),
SIVAKASI – 626 123.**

(Affiliated to Madurai Kamaraj University, Re-accredited with “A” Grade by NAAC,
College with Potential for Excellence by UGC and Mentor Institution under UGC PARAMARSH)

learning community. A lot of software systems have been developed to minimize their work. They are generally referred to as Learning Management Systems (LMSs) and Learning Content Management Systems (LCMSs). The LCMS usually includes an LMS and adds an authoring system that can be used to create, modify, and manage content for a wide range of learning activities. The LCMS can store and retrieve the data on learner scores, question choices, and statistics on learner activity and can use them to give content writers information on the effectiveness of the content and the preferences of the learner. These software systems also provide support for interaction between learning space participants, a mechanism to deliver course materials over the Web, administrative components to allow instructor tracking of student records and monitoring their progress, and collaborative components like bulletin board, chat, e-mail, etc. [1].

Most existing Web-based learning environments focus on the management and distribution of learning materials, synchronous and asynchronous communication, and progress tracking and reporting. Some of them address collaborative learning. However, the most part of such learning environments does not effectively support collaboration models used in modern working life [2].

Learning management system is the traditional approach to e-learning. Learning in LMS is organized as courses. It usually serves as the online platform for course syllabus releasing, distribution of lecture materials, assignments management, and course discussion to students and teachers, who are the member of the same course. Although LMS such as Blackboard, Moodle, and Sakai has been used by numerous universities all over the world to support and improve learning of their students [3]; it is primarily designed for course management purpose and has limited impact on pedagogy. The primary limitations of LMS include lack of personalized control for learners over learning process, limited interaction channel and collaboration manner between learners and educators, restricted interaction and collaboration scope within courses. These limitations make LMS not competent for supporting e-learning in the new era which views learning as a self-governed, problem-based and collaborative social process [4].

Recently, social software including blogs, wikis, social networking sites, and social bookmarking sites etc. are gradually adopted by more and more educators to meet their emerging needs in educations. The main features of social software are to facilitate interaction and collaboration among users. Social software represents a shift to more social, personalized, open, dynamic, emergent, and knowledge-pull model for e-learning [5]. It provides learners with the abilities to improve their problem-solving skills, build connections with a wide variety of peers and teachers and knowledge [6].

Currently, LMS and social software are mostly provided independently by universities and Internet companies to learners and educators. There is no need for additional investment for educational institutions and so they have started incorporating the social software into their daily activities including learning. The disadvantages of this way are isolation of information and connections in different systems, lack of specific

**THE STANDARD FIREWORKS RAJARATNAM COLLEGE FOR WOMEN (AUTONOMOUS),
SIVAKASI – 626 123.**

(Affiliated to Madurai Kamaraj University, Re-accredited with “A” Grade by NAAC,
College with Potential for Excellence by UGC and Mentor Institution under UGC PARAMARSH)

design in function and UI for educational purposes, and dependency on the Internet companies providing social software. So, it is helpful and significant for the educational institutions to provide an integrated e-learning platform for students, teachers, alumni and even the public which can support their interaction and collaboration in learning and teaching both on campus and out of campus [7]. Figure 1 shows the change of learning paradigms.

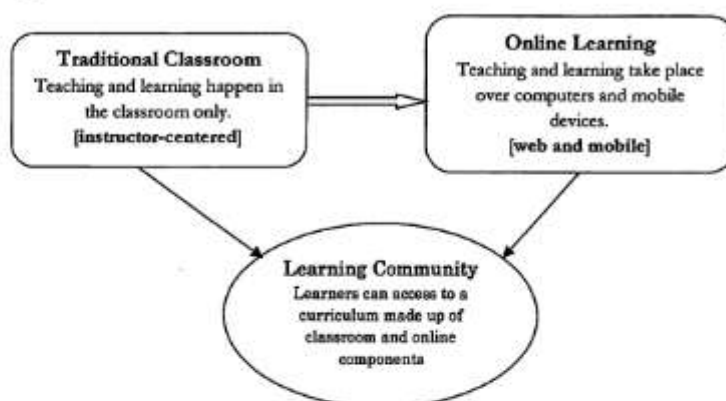

Figure 1. Change of Learning Paradigms

2. LMS

LMS is a software used for proper planning and delivery of educational content to students. It is the anytime solution for content creation for learning, monitoring student participation and assess their performance. It is surely a solution for educational institutions looking forward to better management of learning activities and overall development of students and staff.

2.1 Advantages of LMS

- ✦ **Anytime, anywhere learning:** Students can get access to study materials from anywhere and at any time if they have internet access. Teachers can upload all learning materials for the students to use them whenever required.
- ✦ **Learning costs reduced:** Learning Management Systems offer a chance to save money with proper and easy management of teaching and training. Institutions can save on a lot of administrative costs with lower teaching costs, less traveling, no accommodation costs, etc.

**THE STANDARD FIREWORKS RAJARATNAM COLLEGE FOR WOMEN (AUTONOMOUS),
SIVAKASI – 626 123.**

(Affiliated to Madurai Kamaraj University, Re-accredited with “A” Grade by NAAC,
College with Potential for Excellence by UGC and Mentor Institution under UGC PARAMARSH)

- ✚ **Reports and statistics for better monitoring:** With LMS, teachers have statistics and reports on student performance. Tracking down the learning curve of students is easy. It allows teachers to conduct online quizzes, assignments, surveys and tests.
- ✚ **Easy customization of content:** Easy and fast access to information as allowed by Learning Management System supports fast addition or up gradation of content materials, thus giving the learners fresh new content all time.
- ✚ **Personalized learning with LMS:** Teachers have the opportunity to develop interactive online courses using audio, video, images and texts which are excellent boosts for learning. Proper communication between teachers and learners is facilitated through discussion forums online, thus, making learning more interactive and personalized.
- ✚ **Time saving:** LMS saves a lot of time as compared to the traditional method of teaching. This is because of the courses that are just created and hosted for learners who can use them at their convenience. Physical classrooms do not allow the flexibility of customization of courses and materials according to convenience of students.

2.2 Components of an LMS

- Creation of class rolls and control over registration processes
- Uploading and management of documents containing learning materials.
- Delivery of course content over web-based interfaces allowing remote participation by the teacher or students.
- Creation and publication of course calendars.
- Interaction between students such as instant messaging, email, file sharing and discussion forums.
- Methods of assessment and testing (like creating quizzes, management of assignments).
- Full training management system with easy to use reporting

3. Difference between a LMS and a LCMS

A Learning Management System (LMS) is web-based technology for managing the administration, documentation, tracking, reporting, and delivery of training programs, continuing education, professional development, credentialing, online events, and eLearning programs. It provides organizations with a centralized method for the delivery of online training programs. Built-in assessment and reporting tools allow for automated certificate generation.

**THE STANDARD FIREWORKS RAJARATNAM COLLEGE FOR WOMEN (AUTONOMOUS),
SIVAKASI – 626 123.**

(Affiliated to Madurai Kamaraj University, Re-accredited with “A” Grade by NAAC,
College with Potential for Excellence by UGC and Mentor Institution under UGC PARAMARSH)

A Learning Content Management System (LCMS) provides a multi-user environment where administrators, authors, and content managers can create, store, reuse, and manage learning objects from a central object repository. A learning object can be thought of as a small, self-contained re-usable unit of content that can be used to support learning. Some examples of learning objects include Microsoft Word or PowerPoint files, PDF files, video, and audio. It enables an organization to share learning objects across the enterprise, which saves money, promotes consistent learning, and helps to minimize the cost of eLearning.

The LMS user is the learner, while the LCMS user is the learning content creator.

4. The Future of LMS

LMS continues to evolve and adapt to new learning challenges and technological capabilities including:

- New uses for e-learning content, ranging from the arts to marketing communications
- Tighter integration into collaborative software platforms and messaging frameworks
- Migration of data storage to network-based methods, commonly known as “the cloud.”
- Further integration with talent management software systems

Current trends in technology and business are favoring the increase of collaborative, web-based applications, user-oriented design, and other features. By further inverting the traditional forms of interaction between teachers and students, and enabling a great amount of content to be created and managed more easily, the future of LMS appears to be a dynamic one.

5. Case Study

Today e-learning is reshaping the educational landscape of the world. To keep pace with the knowledge explosion and rapid developments in information technology, innovative ICT enabled teaching methods like preparation of mind maps, creating e-contents and short learning objects are adopted in our campus. LMS is an integrated platform incorporating all digital multimedia content in a much easier way. www.onlinekalvi.com is a website designed with LMS for computer science students. Through the courses offered in the site, students can refer and learn again the lessons taught in the classes. They can revise their lessons through quizzes again and again, submit their assignments online and prepare for competitive examinations. Forums are created for courses to discuss with peers and teachers. Figure 2 shows the home page of the online kalvi website.

In Figure 3, the list of courses available in the Online Kalvi Website are shown.

Figure 3. Course List Display of Online Kalvi Website

6. Conclusion

This paper presented an any where learning system to teach courses. The theoretical parts of the courses are provided by a standard LMS, enabling 1) account management, 2) security protection, 3) collaborative learning, 4) student activity tracking, and 5) feedback collection. The learning process is managed by the students using just a Web browser. Teachers can innovate by maintaining educational and personal mobile websites. Teachers create multimedia learning materials available to read on the wireless networks. In the future, learners may also learn by assembling personal digital portfolios.
